EXERCISE 1: WRITE THE PROBLEM DEFINITION

1 3 1 1			,		
What is the problem?					
When does it occur?					
Where does it occur?					
where does it occur:					
First, take care that the pr	oblem is not a solution	n in disquise.			

Second, avoid complex jargon and technical terms.

Third, review the problem definition in a group as a collaborative exercise. The conversation may lead to identifying different problems

EXERCISE 2: ROOT CAUSE IDENTIFICATION 5X WHY

The next step is to break down the problem into smaller units by diagnosing the situation: what are the root causes of the problem?

Now write down:

1.	Why do you think the problem is happening?
2.	Make a list of root causes.
3.	Develop a hypothesis for the most likely root causes.
4.	Repeat 5 times to create a likely list (the 5 Why's)
5.	Prioritize those problems that are solvable by you working with others.

EXERCISE 3: IDENTIFYING THOSE MOST AFFECTED

3. What are their incentives?

impacted.					
1.	Who is impacted by the problem?				
2	What are their needs?				
۷.	what are their needs:				

EXERCISE 4: REFRAMING THE PROBLEM

One way to reframe the problem is to ask how to prevent the problem from arising in the first place. Can we solve the problem upstream?

1. Are there alternative ways of looking at the issue – from different perspectives -- that yield new insights?

EXERCISE 5: LASSO THE PROBLEM
